Ultraviolet ray lamp	ZDX-ZAU0.8	220V,0.8W	<p>Ultraviolet light could destroy the most of bacteria. Some of virus are hard to be destroy at high temperature, however,the ultraviolet light could destroy them fast in the concontext of no any pharmaceutical chemistry . Ultravioletlight's luminous intensity achieve 30(<math>\mu</math>W/cm2).It could destroy the bacilli,the epiphyte and the virus in effect in ten minutes.</p>
