

Product Introduction :

The product is used in indoor system of 50HZ and rated voltage of 10-15.5KV. It cannot be used independently, instead it must be connected in series together with oil-immersed transformer protection backup fuse to offer an overall protection against indoor electric system. The products are tested by national high-voltage electric facilities Quality Supervising and Testing center, and they are in accordance with GB15166.2 and 1EC282-2.

Type :

Basic parameters :

| Type | Rated voltage KV | High-voltage | Rated current A | Rated Max break curren | Use environment |
|-----------|------------------|--------------|---------------------------------|------------------------|--------------------|
| PRNT-15.5 | 15.5kV | 17.2kV | 6, 10, 15, 25, 50, 65, 100, 140 | 2.5KA | In transformer oil |
